

Source Order

How-to : Change Order of Sources

1. Navigate to Board Configuration Screen > Tab General
2. Move a source

The screenshot shows the JIRA interface for configuring an OverviewBoard. The top navigation bar includes 'JIRA', 'Dashboards', 'Projects', 'Issues', 'Boards', 'WatchTower', and 'Create'. The main header is 'Configure OverviewBoard' with a 'Back to board' link. On the left, a sidebar lists 'CONFIGURATION' options: 'General' (selected), 'Columns', and 'Swimlanes'. The main content area is titled 'General' and contains a description: 'The Board sources determines which issues appear on the board. It can be based on one or more JIRA instances and custom JQL depending on your needs.' Below this, the 'General' section shows the board's name as 'OverviewBoard' and its description as 'Collecting data from Cloud and Hosted JIRAs'. An 'Add source' button is located to the right. The 'Sources' section is a table with columns for 'Key', 'Name', and 'Description'. It lists three sources: 'WT-DEV' (Rozdoum Dev board), 'CLOUD' (Cloud cloud instance), and 'LCL' (Local). The 'CLOUD' source is highlighted with a green box, and a green arrow points to its handle icon on the left, indicating it is the source being moved. Each source has 'Configure' and 'Delete' buttons.

Key	Name	Description
WT-DEV	Rozdoum Dev board	
CLOUD	Cloud cloud instance	
LCL	Local	
RZ	Personal issues	personal issues assigned
