

Task Manager for Confluence Home

Task Manager for Confluence

Create, view, list, edit, and transition Jira issues within a Confluence page.

by **rozdoum**

The banner features a blue and white background with a stylized logo on the left. On the right, there is a screenshot of the application interface showing a list of Jira issues and a detailed view of a specific issue.

Task Manager for Confluence is the app which offers a native interface to work with Jira issues within Confluence. The app frees you from context and tab switching and allows you to create, view, list, edit, and transition Jira tasks directly from a Confluence page.
